

COMPULSORY ETHIOPIAN STANDARDS

2026 CATALOGUE

How to use the catalogue

The main section of this catalogue is the list of Ethiopian Standards classified by subjects that provide optimum possibilities for selection of standards inter-related by subjects. The subject structure of the catalogue is based on the International Classification for Standards (ICS).

The index is arranged alphabetically in a single column down the page. Each title is allowed only one line for each keyword. Titles exceed more than one line are truncated. An asterisk (*) serves as an indication of the truncation.

Keywords are separated from their titles by a bullet symbol (•) with the exception of those cases where a title starts with the keyword. In order to save space, a number sign (#) replaces keywords in the title text. Each entry ends with the number of the page on which complete bibliographic information on the standard is given.

IES in brief

Organization and Objectives

The Institutes of Ethiopian Standards (IES) is the national standards body of Ethiopia established in 2010 based on regulation No. 193/2010 and renamed in 2022 with the regulation of 1263/2022 maintaining the responsibility provided by 193/2010. IESA is established due to the restructuring of Quality and Standards Authority of Ethiopia (QSAE) which was established in 1998 .

IES's objectives are:

- Develop Ethiopian standards and establish a system that enable to check whether goods and services are in compliance with the required standards,
- Facilitate the country's technology transfer through the use of standards,
- Develop national standards for local products and services so as to make them competitive in the international market.

Ethiopian Standards

The Ethiopian Standards are developed by national technical committees which are composed of different stakeholders consisting of educational Institutions, research institutes, government organizations, certification, inspection, and testing organizations, regulatory bodies, consumer

association etc. The requirements and/or recommendations contained in Ethiopian Standards are consensus based that reflects the interest of the TC representatives and also of comments received from the public and other sources. Ethiopian Standards are approved by the National Standardization Council and are kept under continuous review after publication and updated regularly to take account of latest scientific and technological changes. Orders for all Ethiopian Standards, International Standard and ASTM standards, including electronic versions, should be addressed to the Documentation and Publication Team at the Head office and Branch (Liaisons) offices. A catalogue of Ethiopian Standards is also available freely and can be accessed in from our website. IES has the copyright of all its publications. No part of these publications may be reproduced in any form without the prior permission in writing of IES.

International Involvement

IES, representing Ethiopia, is a member of the International Organization for Standardization (ISO), and Codex Alimentarius Commission (CODEX). It also maintains close working relations with the international Electro-technical Commission (IEC) and American Society for Testing and Materials (ASTM). It is a founding member of the African Regional Organization for standardization (ARSO).

Organization and Objectives

The Institute of Ethiopian Standards (IES) is the national standards body of Ethiopia. IES is re-named by the proclamation number 1263/2021, from Ethiopian Standards Agency (ESA) to Institute of Ethiopian standards, with the mandate given by the regulation Number, 193/2010 and proclamation number, 1263/2021.

IES's objectives are:

- ❖ Develop Ethiopian standards and establish a system that enable to check whether goods and service are in compliance with the required standards,
- ❖ Facilitate the country's technology transfer through the use of standards,
- ❖ Develop national standards for local products and services so as to make them competitive in the international market.
- ❖ Conduct standards related research and provide training and technical support.

Ethiopian Standards

The Ethiopian Standards are developed by national technical committees which are composed of different stakeholders consisting of educational and research institutes, governmental organizations, certification, inspection, and testing organizations, regulatory bodies, consumer association etc. The requirements and/or recommendations contained in Ethiopian Standards are consensus based that reflects the interest of the TC representatives and also of comments received from the public and other sources. Ethiopian Standards are approved by the National Standardization Council and are kept under continuous review after publication and updated regularly to take account of latest scientific and technological changes.

Orders for all Ethiopian Standards, International Standard and ASTM standards, including electronic versions, should be addressed to the Documentation and Publication Team at the Head office and Branch (Liaisons) offices). A catalogue of Ethiopian Standards is also available freely and can be accessed from our website.

IES has the copyright of all its publications. No part of these publications may be reproduced in any form without the prior permission in writing of IES. International Involvement IES, representing Ethiopia, is a member of the International Organization for Standardization (ISO), International Electro-technical Commission (IEC) and Codex Alimentarius Commission (CODEX). It also maintains close working relations with the American Society for Testing and Materials (ASTM). It is a founding member of the African Regional Organization for standardization (ARSO).
